In 2025, the global economic and political landscape continued to experience complex fluctuations, presenting numerous difficulties and challenges. Vietnam was not immune to the chain of global geopolitical impacts, facing intertwined difficulties, challenges, opportunities, and advantages, with challenges prevailing. From July 1, 2025, the two-tier local government model was officially implemented, marking a revolutionary transformation in the organizational apparatus as the country enters a new era. The policies and resolutions of the Party and the Government on economic development, digital transformation, administrative reform, and Party building were vigorously implemented, creating momentum for sustainable economic growth in 2025. Against this backdrop, VietinBank closely adhered to the policies and orientations of the Party, the State, and market developments, directing the comprehensive implementation of business solutions, promoting **safe and effective credit growth** in tandem with risk control; vigorously transforming the **growth model**, advancing digital transformation, rapidly shifting the income structure, and expanding modern service channels; proactively optimizing cost efficiency and strengthening asset quality control; and resolutely implementing the plan for **restructuring in conjunction with the bad debts recovery for the 2021–2025 period**, while accelerating restructuring measures to facilitate continued safe and effective growth.
