risks for the debts of customers facing difficulties due to the impact and damage caused by Typhoon No. 3. Circular 53 and Decision 1510 take effect from 4 December 2024.

**5. Consolidation of financial statements:**

- The consolidated financial statements incorporate financial statements of VietinBank, seven (07) subsidiary companies and one (01) subsidiary bank as of 31 December 2024. The financial statements of the subsidiaries are prepared for the same reporting period and consistently apply accounting policies in line with those of VietinBank.

- The entities included in the consolidated financial statements are:

- ❖ VietinBank Leasing Company Limited;
- ❖ VietinBank Securities Joint Stock Company;
- ❖ VietinBank Debt and Asset Management Company Limited;
- ❖ VietinBank Insurance Joint Stock Corporation;
- ❖ VietinBank Gold and Jewellery Trading Company Limited;
- ❖ Vietinbank Fund Management Company Limited;
- ❖ VietinBank Global Money Transfer Company;
- ❖ VietinBank Lao Limited.

**IV. Significant accounting policies adopted in VietinBank**

**1. Basis of consolidation**

The consolidated financial statements incorporate the separate financial statements of the Bank and the financial statements of the enterprises/bank controlled by the Bank (its subsidiaries) for the operating period of Quarter IV 2024 ended 31 December 2024. Control is achieved when the Bank has the power to govern the financial and operating policies of investee enterprises so as to obtain benefits from their activities.

The operating results of subsidiaries acquired or disposed of during the period are included in the consolidated income statement from the effective date of acquisition or up to the effective date of disposal, as appropriate. Where necessary, adjustments are made to the consolidated financial statements of subsidiaries to bring the accounting policies used in line with those used by the Bank. All internal transactions and balances between the Bank and its subsidiaries and among subsidiaries are eliminated in full on consolidation.

Non-controlling interests consist of the value of those non-controlling interests at the date of the original business combination and the non-controlling interests' share of changes in equity since the date of the combination. Losses in subsidiaries are respectively attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance in subsidiaries' net asset value.

**2. Business combinations**

The assets, liabilities and contingent liabilities of the subsidiaries are measured at their fair values at the date of acquisition. Any excess of the cost of acquisition over the fair values of the identifiable net assets acquired is recognized as goodwill. Any deficiency of the cost of acquisition

below the fair values of the identifiable net assets acquired is recognized in the consolidated results of operations for the accounting period in which the acquisition of subsidiaries occurred.

The non-controlling interests are initially measured at the non-controlling shareholders' proportion of the net fair value of the assets, liabilities and contingent liabilities recognized.

**3. Investments in joint ventures**

A joint venture is a contractual arrangement whereby the Bank and other parties undertake an economic activity that is subject to joint control, i.e., the strategic financial and operating policy decisions relating to the activities require the unanimous consent of the parties sharing control. Joint venture arrangements that involve the establishment of a separate entity in which each venturer has an interest are referred to as jointly controlled entities. The Bank reports its interests in jointly controlled entities using the equity method of accounting. According to the equity method, investments in joint ventures are initially stated at historical cost. Subsequently, interests in joint ventures are adjusted by post-acquisition changes in the Bank's share of the net assets of the joint ventures.

**4. Foreign currencies**

According to the Bank's accounting system, all transactions of the Bank are recorded in original currencies. At the date of the consolidated financial statements, monetary assets and liabilities denominated in foreign currencies are translated into VND using the average buying and selling spot exchange rates at the close of business at the period-end date if the difference between this rate and the weighted average exchange rate of the same day is less than 1%. Otherwise, the Bank uses the weighted average exchange rate ruling at the period-end date for conversion. The Bank's foreign currency incomes and expenses are converted into VND at the exchange rate on the date of the transaction. Foreign exchange rate differences arising from the translation of monetary assets and liabilities from foreign currencies into VND in the period are recognized in the consolidated income statement.

**5. Cash and cash equivalents**

Cash and cash equivalents comprise cash, gold, gemstones, current accounts at the SBV, treasury bills and other short-term valuable papers that are qualified for being discounted at the SBV, current accounts, time deposits with term of three months or less from the deposit date at other credit institutions and securities investment with the original maturity of three months or less from the transaction date.

**6. Placements with and loans to other credit institutions**

Placements with and loans to other credit institutions are disclosed and presented at their principal amounts outstanding at the end of the reporting period.

The credit risk classification for placements with and loans to other credit institutions and the corresponding provisioning shall comply with the provisions of Circular No. 31/2024/TT-NHNN dated 30 June 2024 of the SBV and Decree No. 86/2024/ND-CP dated 11 July 2024. Accordingly,

the Bank makes specific provisions for deposits (except for current accounts and placements with Vietnam Bank for Social Policies in accordance with the regulations of the SBV on maintaining balance of deposits at Vietnam Bank for Social Policies of state credit institutions) at other credit institutions and foreign bank branches as prescribed by law, and making deposits at overseas credit institutions and loans to other credit institutions in a similar way to those for loans to customers.

**7. Derivatives**

***7.1. Foreign currency forward and swap contracts***

For foreign currency forward and swap contracts, the difference between equivalent VND amounts of foreign currency purchase/sale commitments using the forward exchange rate and the spot exchange rate as at effective date of the contract is recognized immediately at the effective date of the contract under "Interest and fee receivables" item or "Interest and fee payables" item in the consolidated statement of financial position. The difference is subsequently allocated to "Net gain/(loss) from foreign currency trading" item over the term of the contract.

As at the date of the consolidated financial statements, commitments of foreign currency forward contracts and swap contracts are revaluated and exchange differences arising from the revaluation of foreign currency denominated balances of these contracts are recognized in the consolidated income statement.

***7.2. Interest rate swap contracts***

Commitments of one-currency-interest-rate swap contracts are not recorded in the consolidated statement of financial position. For two-currency-interest-rate swap contracts with nominal principal swap, commitments are recognized in the consolidated statement of financial position. Income and expenses arising from interest rate effects are recorded on the accrual basis. For two-currency-interest-rate swap contracts without nominal principal swap, commitments are recognized in the consolidated statement of financial position at the date of principal exchange. Income and expenses arising from interest rate effects are recorded on the accrual basis.

**8. Loans to customers**

Loans to customers are disclosed and presented at their principal amounts outstanding at the end of the reporting period.

**9. Provision for credit losses**

***9.1 Classification of loans in accordance with Circular 31/2024/TT-NHNN dated 30 June 2024***

According to Circular 31, credit institutions are required to implement loan classification applicable to assets (hereinafter referred to as "debts") including:

- Loans;
- Finance leasing;
- Discounts, rediscounts of negotiable instruments and other valuable papers;
- Factoring;

**15. Leasing**

A lease is classified as a finance lease when significant rights and risks relating to ownership of the leased item are transferred to the lessee. All leases other than finance leases are classified as operating leases.

Operating lease assets are recognized off the consolidated statement of financial position. Rentals under operating leases are recorded in "Operating expenses" on a straight-line basis over the lease term.

**16. Depreciation and amortization**

Depreciation and amortization of tangible fixed assets and intangible assets are calculated on a straight-line basis over the estimated useful lives of the assets as follows:

<u>Assets</u>	<u>Estimated useful lives (Years)</u>
Buildings and structures	05 - 40
Machinery and equipment	03 - 07
Motor vehicles and transmission equipment	06 - 07
Management tools, equipment and other tangible fixed assets	03 - 06
Computer software and other intangible assets	02 - 05

Land use rights are not amortized if they are granted by the Government of Vietnam for an indefinite term. Land use rights with definite term are amortized over the granted term.

**17. Prepaid expenses**

Prepaid expenses include actual expenses that have arisen but are related to the results of production and business activities of many accounting periods. Prepaid expenses comprise prepaid office rentals and other prepaid expenses.

Office rentals represent the office rental paid in advance. Prepaid office rental is allocated to the consolidated income statement using the straight-line method over the rental period.

Other prepaid expenses include repair, maintenance costs for assets, costs of tools and supplies issued for consumption prepaid service charges and other prepaid expenses, which are expected to provide future economic benefits to the Bank. These expenses are capitalized as prepaid expenses and are allocated to the consolidated income statement using the straight-line method over the period of three years or less in accordance with prevailing accounting regulations.

**18. Receivables**

Receivables other than those from credit activities in the Bank's operation are initially recognized at cost and subsequently recorded at cost. Other receivables are subject to impairment review based on the overdue status of the outstanding receivables or based on the expected loss for the following cases: institutional debtors who have fallen into bankruptcy or have been in the process

Accrued interest income of securities that are fallen within the scope of Circular 31 and classified from group 2 upwards is not recognized in the consolidated income statement for the period and these accruals are recorded as off-balance-sheet items and are only recognized in the consolidated income statement upon actual receipt.

**21.2. Insurance income and expenses**

*For direct premium insurance transactions*

Gross direct premiums are recognized in accordance with Circular 67/2023/TT-BTC dated 02 November 2023 ("Circular 67"). Accordingly, gross direct premiums are recognized when one of the following conditions is met: (1) the insurance contract has been entered into by the insurer and the insured, who have fully paid premiums; (2) there is evidence that the insurance contract has been signed and the insured has fully paid the premiums; and (3) when the insurance contract is concluded and the insurance business enterprise agrees with the policyholder on the premium payment period (including the grace period); and (4) when the insurance contract is concluded and there is an agreement with the policyholder on paying premiums in installments as per the insurance contract, the insurance enterprise or the branch of a foreign non-life insurance enterprise records revenue for the premium amount corresponding to the installment(s) that have arisen, and does not record revenue for premiums that are not yet due as per the agreement in the insurance contract.

In the case where the insurance contract is concluded and there is an agreement with the policyholder on paying premiums in installments as per the insurance contract, revenue is recorded for the premium amount corresponding to the installment(s) that have arisen, and revenue is not recorded for premiums that are not yet due as per the agreement in the insurance contract.

The prepaid premium before the due date as at the end of the operating period is recognized in the "Other payables and liabilities" item in the consolidated statement of financial position. Premium return and premium reduction are considered as revenue deduction and must be recorded separately. At the period end, these amounts are net-off to gross written premium to calculate net written premium in the "Income from services" item in the consolidated income statement.

Insurance claim expenses are recognized when the claim documents are completed and approved by the authorized person. Claims that have not been approved as of the end of the financial year are considered unresolved and are recorded for the purpose of provisioning for claims.

The commission expense of each product is calculated at a percentage based on the direct premium stated in Circular 67. Commission expenses are allocated and recognized in the consolidated income statement corresponding with the premium earned.

*For reinsurance transactions*

*(i) Reinsurance ceded*

Reinsurance premium ceded under treaty reinsurance agreements are recognized when gross written premiums within the scope of the treaty agreements are recognized.

Reinsurance premium ceded under facultative reinsurance agreements is recognized when the facultative reinsurance agreement has been signed and when gross written premiums within the scope of the facultative agreements are recognized.

Claim receipts from ceded policies is recognized when there is evidence of liability on the part of the reinsurer.

FOR INDUSTRY AND TRADE**

**Form: B05a/TCTD**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*As at 31 December 2024 and for the period then ended*

According to Circular No. 16/2018/TT-BTC dated 07 February 2018 ("Circular 16") issued by the Ministry of Finance, receivables recognized as accrued income but subsequently assessed to be not recoverable or not yet recoverable at the due date are recorded, the Bank records a reduction in revenue if it is within the same financial year or records it as an expense if it is in a different financial year, and tracks it off-balance sheet to ensure collection. Upon actual receipt of these receivables, the Bank recognizes them as income according to the nature of the income in the consolidated income statement.

**22. Taxation**

Corporate income tax expense represents the sum of the current corporate income tax expense and deferred tax.

The current corporate income tax expense is based on taxable profit for the period. Taxable profit differs from profit before tax as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other periods (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognized on temporary differences between carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases. Deferred tax liabilities are generally recognized for all taxable temporary differences unless, they occurred from the initial recognition of an asset or liability of a transaction which has no impact on accounting profit or taxable profit/(loss) at the transaction date. Deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilized.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realized. Deferred tax is charged or credited to the consolidated income statement, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to corporate income taxes levied by the same tax authority and the Bank intends to settle its current tax assets and liabilities on a net basis.

The determination of the current corporate income tax expense is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

**23. Employee benefits**

**23.1. Post-employment benefits**

Post-employment benefits are paid to retired employees of the Bank and its subsidiaries in Vietnam by the Social Insurance Agency under the Ministry of Labor - Invalids and Social Affairs. The Bank and its subsidiaries in Vietnam are required to contribute to these post-employment

In addition, the Bank shall pay a subsidy of 02 months of additional salary based on job positions with the average key performance indicator ("KPI") of the six consecutive months before retirement.

**23.2. Severance allowance**

According to Article 46 of Labour Code No. 45/2019/QH14 effective from 01 January 2021, the Bank and its subsidiaries in Vietnam are responsible to pay severance allowance for employees who have regularly been working at the Bank for 12 months or more, with half-month salary allowance for each working year (clauses 1, 2, 3, 4, 6, 7, 9 and 10 of Article 34 of the Labor Code), except for those who are eligible for receiving pension under the provisions of the Law on Social insurance and those as specified at Point e, Clause 1, Article 36 of the Labor Code 2019. The working period used for calculation of severance allowance excludes the period that employees benefit from unemployment insurance in accordance with regulations and the working period that employees have received severance allowance and retrenchment benefits from employers. The salary as the basis for calculation of severance allowance shall be the average salary of the last 06 months under the employment contract before the termination of labor contract.

**23.3. Unemployment insurance**

According to Circular No. 28/2015/TT-BLDTBXH dated 31 July 2015 ("Circular 28") of the Ministry of Labor - Invalids and Social Affairs guiding the implementation of Article 52 of the Employment Law 2013 and Decree No. 28/2015/ND-CP of the Government dated 12 March 2015 regulating the implementation of the Employment Law on unemployment insurance, from 01 January 2009, the Bank and its subsidiaries in Vietnam are obliged to pay unemployment insurance to eligible employees at 1% of their salary fund allocated for unemployment insurance.

**24. Related parties**

The parties are considered to be related if one party has the ability to control the other party or exercise significant influence over the other party in making decisions on financial and operating policies. A party is considered as a related party with the Bank if:

- a. Directly or indirectly through one or more intermediaries, the party:
  - Controls, or is controlled by, or is under common control by the Bank (including the holding company and its subsidiaries);
  - Contributes capital to the Bank and therefore has significant influence over the Bank;
  - Has joint control over the Bank.
- b. The party is a joint venture or an associate of which the Bank is a venturer or an investor;
- c. The party has a key management personnel who is also a member of the Board of Directors, Board of Management, and Board of Supervisors of the Bank;
- d. The party is a close member of the family of any individual referred to in (a) or (c);
- e. The party is an entity that is, directly or indirectly controlled, jointly controlled or significantly influenced by, or of which, significant voting power in such entity resides with, any individual referred to in (c) or (d).

## **25. Technical reserves for insurance activities**

The technical reserves are calculated in accordance with Circular 67 and Official Letter approved by the Ministry of Finance including Official Letter No. 2821/BTC-QLBH dated 13 March 2018 and Official Letter No. 2160/BTC-QLBH dated 28 February 2024. Details are as follows:

### ***Technical reserves for non-life insurance***

#### ***Unearned premium reserve***

For non-life insurance policies, reinsurance policies ("insurance policy"), unearned premium reserve is made based on the coefficient of the insurance policy duration on a daily basis, calculated on the premium amount.

#### ***Claim reserve***

For incurred losses that have been reported, the original and reinsurance claim reserves, as well as the ceded reinsurance claim reserves, are established on a case-by-case basis, based on the liability level for the reported incurred losses.

- For incurred but not reported (IBNR) losses, reserves are established based on the statistical compensation rate over the previous three consecutive years. Specifically as follows:

$$\begin{array}{ccccccc}
 \begin{array}{c} \text{Claims} \\ \text{reserve for} \\ \text{covered} \\ \text{losses that} \\ \text{have} \\ \text{occurred but} \\ \text{have not} \\ \text{been} \\ \text{reported or} \\ \text{claimed of} \\ \text{the current} \\ \text{fiscal year} \end{array} & = & \begin{array}{c} \text{Total indemnities for} \\ \text{losses that have} \\ \text{occurred but have not} \\ \text{been reported or} \\ \text{claimed of last three} \\ \text{consecutive fiscal} \\ \text{years} \end{array} & \times & \begin{array}{c} \text{Indemnity} \\ \text{of current} \\ \text{fiscal} \\ \text{year} \end{array} & \times & \begin{array}{c} \text{Net revenue} \\ \text{earned from} \\ \text{insurance} \\ \text{business of} \\ \text{current fiscal} \\ \text{year} \end{array} & \times & \begin{array}{c} \text{Average} \\ \text{deferred time} \\ \text{of claims of} \\ \text{current fiscal} \\ \text{year} \end{array} \\
 & & \begin{array}{c} \text{Total indemnities} \\ \text{of last three} \\ \text{consecutive fiscal} \\ \text{years} \end{array} & & & & \begin{array}{c} \text{Net revenue} \\ \text{earned from} \\ \text{insurance} \\ \text{business of last} \\ \text{fiscal year} \end{array} & & \begin{array}{c} \text{Average} \\ \text{deferred time} \\ \text{of claims of} \\ \text{last fiscal year} \end{array}
 \end{array}$$

Including:

The compensation amount incurred in a financial year includes the actual compensation paid during the year plus the increase/decrease in claim reserves for incurred losses that fall under insurance liability but have not been settled by the end of the financial year.

The average deferred time of claims requests is the average time from when the loss occurs to when the Corporation receives the loss notification or the claim request file (measured in days).

#### ***Catastrophe reserve***

According to Vietnamese Accounting Standard No. 19 on Insurance Contracts, losses that have not occurred and do not exist as of the financial statement reporting date (including catastrophe reserves) do not need to be reserved. However, the VietinBank Insurance Joint Stock

Corporation follows the reserve policy as stipulated in Circular 67, where the catastrophe reserve is uniformly applied to all types of operations at 1% of the retained insurance premiums for the year.

***Technical reserve for health insurance***

***Mathematical reserve***

- For health insurance and reinsurance contracts (insurance contracts) with a term of more than one year, the premium reserve is established based on the ratio of the insurance contract term per day on the basis of the insurance premium.
- For health insurance and reinsurance contracts (insurance contracts) covering cases of death or permanent disability, the premium reserve is established based on the ratio of the insurance contract term per day on the basis of the insurance premium.

***Unearned Premium reserve***

For health insurance and reinsurance contracts (insurance contracts) with a term of less than one year, the premium reserve is established based on the ratio of the insurance contract term per day on the basis of the insurance premium.

***Claim reserve***

For incurred losses that have been reported, the original and reinsurance claim reserves, as well as the ceded reinsurance claim reserves, are established on a case-by-case basis, based on the liability level for the reported incurred losses.

For incurred but not reported (IBNR) losses, reserves are established based on the statistical compensation rate over the previous three consecutive years. Specifically as follows:

The average deferred time of claim requests is the average time from when the loss occurs to when the Corporation receives the loss notification or the claim request file (measured in days).

*Equalization reserve*

Equalization reserve for health insurance is set up at 1% of retained premium in the period and recognized in catastrophe reserve account on the consolidated financial statement.

**26. Offsetting**

Financial assets and financial liabilities are offset and the net amounts are reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

The Bank is not allowed to offset reserves for direct insurance and assumed reinsurance against reserve for ceded reinsurance. Such reserves should be presented separately in the consolidated statement of financial position, in which unearned premiums reserve, claims reserve for direct insurance and assumed reinsurance and catastrophe reserve are recognized as liabilities in "Other payables and liabilities" item in the consolidated statement of financial position; while unearned premium reserve for outward reinsurance and claims reserve for ceded reinsurance are recognized as reinsurance assets in "Other assets" item in the consolidated statement of financial position..

The bank is obligated to pay corporate income tax at a rate of 20% on total taxable profits. The bank's tax reports are subject to examination by tax authorities. Due to the application of laws and tax regulations to various types of transactions that can be interpreted in different ways, the tax amounts presented in the financial statements may be subject to change based on the final decision of the tax authorities.

**Current Corporate Income Tax**

Current corporate income tax payable is determined based on the taxable income of the current year. Taxable income differs from the income reported in the consolidated income statement because taxable income does not include income items that are taxable or deductible in different years due to differences between the bank's accounting policies and current tax regulations, and also does not include items that are non-taxable or non-deductible for tax purposes. The bank's current corporate income tax payable is calculated at the tax rates enacted by the end of the financial year.

## **24. EXPLANATION FOR THE FLUCTUATION OF PROFIT**

The consolidated profit after corporate income tax of VietinBank in Q4/2024 increased by 3.816 billion VND (equivalent to 63 %) compared to the same period in 2023, primarily due to an increase in profit before tax of 4.657 billion VND (equivalent to 61%) over the same period, specifically:

	<b>Impact</b>	
	<b>Absolute billion VND</b>	<b>Relative %</b>
<b>Major fluctuation items</b>		
Increase in net interest income	1.866	24%
Increase in net other operating income	1.036	14%
Decrease in provision expenses for credit losses	2.008	26%
<b>Total</b>	<b>4.910</b>	<b>64%</b>

### *Detailed reasons*

**Increase in net interest income:** mainly due to efforts for further expansion (outstanding loans as of 31/12/2024 grew nearly 17% compared to the same period). Leveraging its role as a leading commercial bank in capital supply for the economy, the Bank continued to implement credit packages and preferential interest rate programs to support individuals and businesses, effectively balancing capital, promoting CASA growth and short-term funding to optimize capital mobilization costs.

**Decrease in provision expenses for credit losses:** The Bank has proactively identified risks early and classified loan appropriately based on customers' risk levels, while adequately made provision for credit risks in compliance with the State Bank of Vietnam (the SBV) regulations. Additionally, the Bank strengthened its risk provision buffer, especially after Yagi Typhoon in September 2024, to prepare for potential economic risks. Therefore, provision expenses for credit losses in 2024 increased by 2.484 billion VND compared to 2023.

**Increase in net other operating income:** mainly because the Bank continues to focus resources on, flexibly and synchronously implement measures to quickly process and recover bad debts throughout the system.

## **VIII. FINANCIAL RISK MANAGEMENT**

### **25. FINANCIAL RISK MANAGEMENT POLICIES RELATED TO FINANCIAL INSTRUMENTS**

Under the guidance of the SBV on enhancing the role of risk management in credit institutions, the Bank continues implementing risk management policies for its entire business.

In order to achieve sustainable development, improve operational efficiency and competitive advantage, the Bank has always been one of the pioneers in reseaning and applying international practices to its governance. In particular, the Bank met requirements of the SBV in accordance with Basel II with the standards of risk management, capital management, proving information, and has focused on internal and enhancing calculation method according to Basel II. The application of advanced practices in risk management is a prerequisite for the integration and expansion of the Bank's influence in the global financial banking industry. The Bank has always played a pioneering role in modernizing the banking system.

In 2024, the Bank continued actively studying and implementing projects in order to comprehensively enhance the management of all types of risks. Moreover, the Bank has continued to complete its policy system in five (5) levels, namely: (i) General policy regime, (ii) Detailed policies, (iii) Guidance documents on policies, (iv) General processes, and (v) Detailed processes for each product in order to ensure consistency and overall effectiveness of the policy system.

To manage risk related to financial instruments, the Bank has issued regulations, procedures, detailed guidance, sets of indicators and internal limits as well as strictly managed the balance between assets and liabilities, tightly controlled business activities' growth and credit quality; complied with limitation and safety ratios for operation; requirements for risk management as stipulated in Circular No. 22/2019/TT-NHNN, Circular No. 41/2016/TT-NHNN, Circular No. 13/2018/TT-NHNN and amendments and supplements of the SBV and the regulatory authorities; which has gradually met requirements for risk management.

The Bank's financial instruments are detailed in the table below:

**25.1. Interest rate risk:**

Interest rate risk is the possibility of the Bank's income or asset value being affected when market interest rate fluctuates.

Interest rate risk of the Bank can derive from investment activities, capital mobilization and lending activities.

The re-pricing period for effective interest rate is the remaining period from the date of consolidated financial statements to the nearest interest rate re-pricing term of assets and capital. The following assumptions and conditions have been adopted in the analysis of the re-pricing period of the Bank's assets and liabilities:

- ▶ Cash, gold and gemstones; balances with the SBV; fixed assets; capital contribution, long-term investments are classified as non-interest-bearing items;
- ▶ The effective interest rate re-pricing term of trading securities is calculated on the basis of the effective interest rate re-pricing term specified in contracts/agreements or in accordance with regulations on expected holding period of the bank, depending on whichever comes earlier;
- ▶ The effective interest rate re-pricing term of placements with and loans to other credit institutions; investment securities; loans to customers; other assets; borrowings from the Government and the SBV; deposits and borrowings from other credit institutions; deposits from customers; valuable papers issued; grants, trusted funds and borrowings where the Bank bears risks are determined as follows:
  - Items with fixed interest rate during the contractual period: the effective interest rate re-pricing term is determined from the reporting date to maturity date;
  - Items with floating interest rate: the effective interest rate re-pricing term is determined from the reporting date to the nearest interest rate re-pricing date;
  - Accrued income, accrued expenses: Classified as non-interest-bearing items.

***The Bank's interest rate risk policies***

For interbank lending activities (short-term), investment interest rate is based on the fluctuation of the market and the Bank's cost of capital. The interbank loans are usually short-term (of less than 3 months).

Based on forecasts on the market fluctuations of interest rate and its capital balancing ability, the Bank will make appropriate investment decisions. In case that interest rates are forecasted to go down, the Bank will strengthen long-term investments to increase profitability. In contrast, if interest rates are forecasted to go up, the Bank will increase short-term investments.

**VIETNAM JOINT STOCK COMMERCIAL BANK FOR  
INDUSTRY AND TRADE**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*As at 31 December 2024 and for the period then ended*

For capital mobilization activities, interest rates are determined based on the market price, the business orientation of the Bank's management, the Bank's capital balance and regulations of the SBV. The Bank's mobilized capital mainly has a short interest rate re-pricing term.

For lending activities, the Bank determines lending interest rates based on the principle of sufficient coverage for cost of capital, management expenses, risk considerations, collaterals' values and market interest rate to ensure the Bank's competitiveness as well as the efficiency. The Head Office regulates the lending interest rate floor for each period; branches can decide lending interest rates of each customer for each period based on credit risk analysis and assessment provided that these rates are not below the regulated floor rate and the annual budgeted profit is assured. Besides, due to the capital structure mainly comprising funds with short interest rate re-pricing terms, the Bank requires that all long-term and medium-term loans' interest must be floating (interest rates are not fixed during the whole loans' periods) to minimize possible arising interest rate risk.

***Interest rate risk management***

The Bank manages interest rate risk at 2 levels: transaction level and portfolio level.

***Interest rate risk management at the portfolio level***

- ▶ The Bank has issued regulations and procedures for managing interest rate risk on the banking book, which stipulate the principles for managing interest rate risk on the banking book through the process of identification, measurement, control and monitoring of risk to ensure the balance between the interest rate risk control/prevention goal and the maximization of net interest income as well as the economic value of equity in the business operations of the Bank.
- ▶ The Bank has completed the design, officially implemented and continuously upgraded the Assets-Liabilities Management ("ALM") software system, which runs to the transaction level under international practices, automatically provides reports on re-evaluation term differences by nominal terms and by behaviours, scenarios analysis reports on interest rate increase/decrease situations, etc. in order to facilitate the Bank's interest rate risk management activities.
- ▶ The Bank adjusts the re-pricing term of assets to the re-pricing term of capital, ensuring the re-evaluation term difference is within the permitted limit.

***Interest rate risk management at the transaction level***

- ▶ All credit contracts are required to include terms relating to interest rate risk prevention to ensure that the Bank can take initiative in coping with fluctuations of the market; lending interest rate must be set to accurately reflect the Bank's actual cost of capital.

- ▶ Management through the Fund Transfer Pricing (FTP) tool: the Bank has completed and continuously improves the internal Fund Transfer Pricing system (FTP), which has enhanced the Bank's centralized management of capital and interest rate. Depending on the Bank's business orientation and the market movements, the Head Office can adjust FTP for each type of customers or products, etc., giving financial signals for the business units to determine their lending/capital mobilization rates applicable to each transaction.

**25.2. Liquidity risk management policy disclosure**

Liquidity risk is defined as the risk that the Bank has difficulties in meeting obligations associated with its financial liabilities; or when the Bank has to mobilize funds at a higher cost compared to the average market cost to meet its payment obligations in line with the Bank's internal rules.

The Bank had issued regulations and procedures on liquidity management, including rules about managing liquidity gap through maturity, liquidity risk ratios, stress test scenarios and backup plans to proactively take measures when facing market volatility. To minimize liquidity risk, the Bank plans to diversify its funding sources, develops a fund management report system to calculate liquidity position on a daily basis, as well as prepares analysis and forecast report on future liquidity positions on a regular basis, setting liquidity risk appetite and capacity.

At regular ALCO Committee, ALCO Council meetings, fund balance and liquidity of the Bank is one of the key contents to be discussed. At Risk Management Committee, Risk Council meetings, the compliance with liquidity risk appetite and risk capacity is also reviewed and reported. Based on analysis and evaluation, Risk Management Committee/ALCO Council/Risk Council make recommendations to the Board of Directors and the Board of Management for future guidance to maintain the Bank's solvency in a safe and effective way.

In addition, the Bank also maintains a list of high liquid assets such as the Government bonds, which may be sold or under repurchased contracts with the SBV. It is not only a secondary reserve in liquidity stress circumstances (if any) but also a profitable investment.

The maturity of assets and liabilities represents the remaining time from the reporting date of the consolidated financial statements until the payment date regulated in the contract or terms of issuance.

The following assumptions and conditions have been adopted in the analysis of the Bank's maturity relating to its assets and liabilities:

- ▶ Cash, gold, silver and gemstones and balances with the SBV are classified into maturity up to one month;
- ▶ The maturity of placements and balances with and loans to other credit institutions; derivative financial instruments and other financial assets; loans to customers; investment securities; other assets; borrowings from the Government and the SBV; deposits and borrowings from other credit institutions; valuable papers issued; grants, trusted funds and borrowings where the Bank bears risks: is determined based on the terms and conditions on the contracts.

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS**

*As at 31 December 2024 and for the period then ended*

- ▶ The maturity of trading securities is calculated on the basis of the probable time to convert bonds into cash because this portfolio includes highly liquid bonds;
- ▶ The maturity of customers' deposit is calculated on the basis of customers' behaviours and forecasts about the changes in interest rates and other macro-economic factors ;
- ▶ The maturity date of capital contribution, long-term investments is classified as over five (05) years as these investments have no defined maturity;
- ▶ The maturity date of fixed assets is classified as over five (05) years .

Based on the Board of Management's approval of the annual business plan, the Asset & Liability Management Department in cooperation with relevant specialized departments makes analysis and forecasts on cash inflows/outflows of the system according to the approved plan; and also based on the actual daily capital fluctuations and utilization, the Bank makes decisions on appropriate management and monitoring of available funds.

Based on the projection of available capital, the Asset & Liability Management Department in cooperation with the Treasury Dealing Department manage the secondary reserve through the purchase of highly liquid valuable papers, which could be converted into cash on the secondary market. The Asset & Liability Management Department together with the Treasury Dealing Department may decide to sell valuable papers to the SBV on the open market, or to refinance loans when working capital is insufficient, ensuring the liquidity of the whole system.

Based on the SBV's regulations, the Asset & Liability Management Department in cooperation with the Treasury Dealing Department proposes the Bank's available fund management plan, ensuring the actual average balance of deposits in VND and foreign currencies at the SBV is not below the required level of compulsory reserve. Besides, the Bank also establishes credit limit with other banks and credit institutions for mutual support when needed. The Market Risk Management Department acts as an independent supervisor to ensure that the liquidity risks are managed in compliance with regulations, management processes, and liquidity risk appetite/capacity of the Bank.

The amount of available funds is determined based on data from the Core Sunshine system, interbank payment program CITAD, Asset-Liability Management software, information about large cash flows from business units. Therefore, the Bank can actively manage its daily liquidity risk.

The Bank's liquidity risk management activities are monitored strictly in compliance with the regulations of the SBV and the Bank's internal criteria for liquidity management for each major currency (such as VND, USD, EUR) for capital mobilization and loan portfolios.

### **25.3. Currency risks**

Currency risk is the risk that the Bank's asset or value of an investment fluctuates due to changes in foreign exchange rates.

The Bank was incorporated and operates in Vietnam and its reporting currency is VND. The Bank's main transaction currency is VND, while a part of the Bank's asset-equity is in foreign currencies (USD, EUR, etc.). Thus, currency risk may arise.

*To prevent the risk of exchange rate fluctuations, the Bank has synchronously applied the following measures:*

Based on actual data collected, take into account the growth demand of affiliates and business orientations, the Asset – Liability Management ("ALM") Department and the Financial Planning & Management Department analyse, provide projections on cash inflows/outflows and propose the capital planning for each currency type to the Management Board, which is managed based on actual daily cash flows to ensure operational safety and effectiveness of the whole system.

The Bank's capital mobilization and lending activities are mainly in VND, with a small portion in USD, EUR, and other foreign currencies. According to the business plan of each period, the Bank has a currency position in its capital trading activities when conducting financial transactions in the market. The Bank sets position limits for USD and other foreign currencies converted to USD based on the Bank's internal risk appetite and relevant regulatory authorities' regulations. The Treasury Department at the Head Office centrally manages the foreign currency position at the Head Office.

Currency positions are managed on a daily basis and hedging strategies are used by the Bank to ensure that the positions of currencies are maintained within the established limits.
